Hayes Aluminum Housings

Today, there are thousands of Hayes aluminum housings in service throughout the world. Together with our “original” Hayes flywheel coupling and our torsionally stiff HEX-FLX flywheel couplings, our aluminum housings tackle tough gas and diesel engine applications.

The housings take up very little space, while supporting a significant amount of weight. They are available with a wide variety of mounts and sensor options, and can be used in conjunction with our bearing supported stub shafts and generator drives.

Design Characteristics:

Sturdy Aluminum Castings

- Heat treated aluminum housings
- Thick walls for extra support and thread engagement

Mounts

- Foot mounts
- Side mounts
- Face Mounts
- Top Mounts
- Special pump mount options are always available

Features and Advantages:

- Sturdy “High-Strength “ aluminum construction
- Custom fit to engine starter plates
- SAE and non-SAE pump mounting
- Standard and special engine mounts
- Custom/personalized housings available upon request
- Thick wall design for heavy pump applications
- Painted housings (available upon request)
- Competitively priced and normally in stock

Applications:

- Our housings are used on a variety of different diesel and gasoline applications.
